

Writing an Effective Policy Memo using the Bardach Eightfold Path

February 4, 2025

Writing an Effective Policy Memo

- Before you begin...

Writing an Effective Policy Memo

- Before you begin...
 - ▶ Who is your audience?
 - Federal, state, local
 - Policymaker, advocacy group, stakeholder group

Writing an Effective Policy Memo

- Before you begin...
 - ▶ Who is your audience?
 - Federal, state, local
 - Policymaker, advocacy group, stakeholder group
 - ▶ What is your purpose?
 - Inform
 - Persuade

Bardach Technique for Policy Analysis

Bardach Technique for Policy Analysis

- Step 1: Define the Problem
- Step 2: Assemble Some Evidence
- Step 3: Construct the Alternatives
- Step 4: Select the Criteria
- Step 5: Project the Outcomes
- Step 6: Confront the Trade-Offs
- Step 7: Decide
- Step 8: Tell Your Story

Bardach Technique for Policy Analysis

- **Step 1: Define the Problem**
- **Step 2: Assemble Some Evidence**
- **Step 3: Construct the Alternatives**
- **Step 4: Select the Criteria**
- Step 5: Project the Outcomes
- Step 6: Confront the Trade-Offs
- **Step 7: Decide**
- **Step 8: Tell Your Story**

Bardach Step 1 - Define the Problem

- **Step 1: Define the Problem.**
- A policy memo begins with a problem statement.
 - ▶ Short statement (1-3 sentences) summarizing the issue to be considered.

Bardach Step 1 - Define the Problem

- **Step 1: Define the Problem.**
- A policy memo begins with a problem statement.
 - ▶ Short statement (1-3 sentences) summarizing the issue to be considered.
- What do we want to accomplish with the problem statement?
 - ▶ Grab attention and spark interest
 - ▶ Convey the importance of the problem

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.
- Avoid “issue rhetoric”.

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.
- Avoid “issue rhetoric”.
 - ▶ Partisan, ideological, or personal language.

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.
- Avoid “issue rhetoric”.
 - ▶ Partisan, ideological, or personal language.
- Quantify if possible.

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.
- Avoid “issue rhetoric”.
 - ▶ Partisan, ideological, or personal language.
- Quantify if possible.
 - ▶ “Too many relatively well-off people are taking advantage of low-rent public housing.”

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.
- Avoid “issue rhetoric”.
 - ▶ Partisan, ideological, or personal language.
- Quantify if possible.
 - ▶ “Too many relatively well-off people are taking advantage of low-rent public housing.”
 - ▶ “Too many people with annual incomes over \$60,000 are living in subsidized housing.”

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.
- Avoid “issue rhetoric”.
 - ▶ Partisan, ideological, or personal language.
- Quantify if possible.
 - ▶ “Too many relatively well-off people are taking advantage of low-rent public housing.”
 - ▶ “Too many people with annual incomes over \$60,000 are living in subsidized housing.”
- Avoid defining the solution into the problem.

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.
- Avoid “issue rhetoric”.
 - ▶ Partisan, ideological, or personal language.
- Quantify if possible.
 - ▶ “Too many relatively well-off people are taking advantage of low-rent public housing.”
 - ▶ “Too many people with annual incomes over \$60,000 are living in subsidized housing.”
- Avoid defining the solution into the problem.
 - ▶ “There is too little shelter for families experiencing homelessness.”

Bardach Step 1 - Define the Problem

- It helps to think in terms of deficit and excess.
 - ▶ “The demand for agricultural water is growing faster than our ability to supply it at an acceptable financial and environmental cost.”
- Can you frame the problem as a market failure?
 - ▶ Externality, information asymmetry, travel cost, etc.
- Avoid “issue rhetoric”.
 - ▶ Partisan, ideological, or personal language.
- Quantify if possible.
 - ▶ “Too many relatively well-off people are taking advantage of low-rent public housing.”
 - ▶ “Too many people with annual incomes over \$60,000 are living in subsidized housing.”
- Avoid defining the solution into the problem.
 - ▶ “There is too little shelter for families experiencing homelessness.”
 - ▶ “There are too many families experiencing homelessness.”

Bardach Step 1 - Define the Problem

- ITERATE!!!

Bardach Step 1 - Define the Problem

- ITERATE!!!
- Examples:

Bardach Step 1 - Define the Problem

- ITERATE!!!
- Examples:
 - ▶ “A lack of price transparency is responsible for stalling competition among health care providers and increasing insurance costs.”

Bardach Step 1 - Define the Problem

- ITERATE!!!
- Examples:
 - ▶ “A lack of price transparency is responsible for stalling competition among health care providers and increasing insurance costs.”
 - ▶ “Ten percent of public high school students in Boston smoke.”

Bardach Step 1 - Define the Problem

- ITERATE!!!
- Examples:
 - ▶ “A lack of price transparency is responsible for stalling competition among health care providers and increasing insurance costs.”
 - ▶ “Ten percent of public high school students in Boston smoke.”
 - ▶ “The quality of care in the U.S. is spotty, despite costs vastly greater than those of any other nation. And almost 50 million Americans are uninsured.”

Bardach Step 1 - Define the Problem

- ITERATE!!!
- Examples:
 - ▶ “A lack of price transparency is responsible for stalling competition among health care providers and increasing insurance costs.”
 - ▶ “Ten percent of public high school students in Boston smoke.”
 - ▶ “The quality of care in the U.S. is spotty, despite costs vastly greater than those of any other nation. And almost 50 million Americans are uninsured.”
 - ▶ “The 1993 Family Medical Leave Act (FMLA) provides up to twelve weeks of unpaid, job-protected leave for specified family and medical reasons. However, nearly 40% of workers are not covered by FMLA, or do not use it because of the financial implications of unpaid leave.

Bardach Step 1 - Define the Problem

- ITERATE!!!
- Examples:
 - ▶ “A lack of price transparency is responsible for stalling competition among health care providers and increasing insurance costs.”
 - ▶ “Ten percent of public high school students in Boston smoke.”
 - ▶ “The quality of care in the U.S. is spotty, despite costs vastly greater than those of any other nation. And almost 50 million Americans are uninsured.”

Interviews

US drug costs have reached unacceptable and unsustainable levels. Evidence shows that “financial toxicity” arising from drug costs and other medical expenses is reducing financial security for many families¹ and prompting difficult choices, as patients defer or forgo therapies they cannot afford.² In stark contrast, comparable countries negotiate drug prices and use drugs more effectively. Recent data suggest that other high-income countries have an average life expectancy approximately 3 to 5 years longer than that of the United States, which ranks last among high-income countries and is losing ground compared with peer nations.³ Although drug prices account for only part of these trends, they nevertheless add to disparities that dominate the trajectories of US health outcomes.

Bardach Step 2 - Assemble Some Evidence

- **Step 2: Assemble Some Evidence.**

Bardach Step 2 - Assemble Some Evidence

- **Step 2: Assemble Some Evidence.**
- What has worked in other places?

Bardach Step 2 - Assemble Some Evidence

- **Step 2: Assemble Some Evidence.**
- What has worked in other places?
- How do we know if something has worked? (More to come when we discuss research designs.)

Bardach Step 3 - Construct the Alternatives

- **Step 3: Construct the Alternatives.**
- “Alternatives” are really just policy *options*.

Bardach Step 3 - Construct the Alternatives

- **Step 3: Construct the Alternatives.**
- “Alternatives” are really just policy *options*.
- Alternatives might not be mutually exclusive, but a “first best” option may exist.

Bardach Step 3 - Construct the Alternatives

- **Step 3: Construct the Alternatives.**
- “Alternatives” are really just policy *options*.
- Alternatives might not be mutually exclusive, but a “first best” option may exist.
- Start comprehensive, end up focused.
 - ▶ “How would you solve a problem if cost were no object?”

Bardach Step 4 - Select the Criteria

- We need to determine the criteria by which we'll judge a successful policy solution. These criteria should be explicit.

Bardach Step 4 - Select the Criteria

- We need to determine the criteria by which we'll judge a successful policy solution. These criteria should be explicit.
- Some examples:
 - ▶ Equity
 - ▶ Efficiency
 - ▶ Cost
 - ▶ Political feasibility

Bardach Step 4 - Select the Criteria

Lowering Cost and Increasing Access to Drugs Without Jeopardizing Innovation

Robert M. Califf, MD^{1,2}; Andrew Slavitt, MBA³

[> Author Affiliations](#) | [Article Information](#)

JAMA. 2019;321(16):1571-1573. doi:10.1001/jama.2019.3846

An effective policy solution to this problem must satisfy the core requirements of reducing drug costs and increasing access to beneficial drugs, while continuing to incentivize development of new therapies. The path forward requires a sustainable, fair payment system in which drug prices reflect the value provided and reward innovations that improve outcomes. Four Viewpoints in this issue of *JAMA*⁴⁻⁷ recommend different but overlapping approaches for achieving these goals.

Bardach Step 7 - Decide

- Recommend the policy proposal (or proposals) that would solve or mitigate the problem.

JAMA. 2019;321(16):1571-1573. doi:10.1001/jama.2019.3846

The most effective ways to address pricing involve 4 categories: importation from other countries; reduction of bloated administrative and marketing activities; direct negotiations between federal payers and industry; and creation of a value-based system.

Bardach Step 8 - Tell Your Story

- Apply the grandparent test

Bardach Step 8 - Tell Your Story

- Apply the grandparent test
- Gauge your audience

Bardach Step 8 - Tell Your Story

- Apply the grandparent test
- Gauge your audience
- Consider your medium
 - ▶ Policy memo
 - ▶ Infographic
 - ▶ Leave-behind document
 - ▶ Give your story a logical narrative flow
